Professional Summary

Software Engineer specializing in Python, Django, FastAPI, and full-stack web development with experience building scalable REST APIs, secure authentication systems, and production-ready applications. Skilled in PostgreSQL, React, TypeScript, Docker, and modern software engineering practices, with expertise in database design, backend optimization, JWT/OAuth, and AI-powered application development.

Technical Skills

Languages: Python, JavaScript (ES6+), TypeScript, C++

Backend: Django, Django REST Framework, FastAPI, JWT Authentication, OAuth, Role-Based Access Control

Frontend: React, Redux, Next.js, Tailwind CSS, React Router

Databases: PostgreSQL, MongoDB

Tools & DevOps: Git, GitHub, Docker, Postman, NPM, Cloudinary

Machine Learning: TensorFlow, OpenCV, NumPy, Streamlit, Deep Learning

Professional Experience

Software Developer Intern, CodeCouse — Nov 2023 – Jan 2024

- Designed PostgreSQL and MySQL database schemas and implemented secure REST APIs.
- Collaborated using Git/GitHub to develop features, debug applications, and optimize backend performance.

Technical Projects

HeadChef – Full-Stack Recipe & Guided Cooking Platform — GitHub

- **Tech Stack:** Django REST Framework, React, TypeScript, PostgreSQL
- Built a production-ready full-stack recipe platform using modular REST API architecture.
- Implemented JWT authentication, Google OAuth, Cloudinary integration, custom user models.
- Engineered interactive cooking sessions featuring timers, pause/resume, progress tracking, and persistent session management.

Full-Stack E-Commerce Platform — GitHub

- **Tech Stack:** Django, Python, Stripe, HTML/CSS.
- Built a full-stack e-commerce platform featuring a shopping cart, order processing, and a shop interface.
- Developed account management capabilities including user registration, login, and profiles.
- Created a dedicated seller dashboard enabling users to create, manage, and delete product listings.

LipRead – Visual Speech Recognition System

- Developed an end-to-end lip-reading system using TensorFlow, OpenCV, and Streamlit.
- Implemented CNN and Bidirectional LSTM models with video preprocessing and sequence modeling.
- Achieved 1.12% Word Error Rate (WER) on the Oxford LRS2 benchmark dataset.

Education & Certifications

Savitribai Phule Pune University, B.Tech in Computer Science & Engineering — 2020 – 2024

- **CGPA:** 7.34/10
- **Certifications:** Django REST Framework, PostgreSQL, Docker
